ABOUT ME

I am a BCA student passionate about software development, AI, and building useful digital products. I learn by building real projects while developing my skills in C++, data structures, web development, and problem-solving. I also explore AI-assisted development, turning ideas and prompts into functional projects and applications.

PROJECTS

NextPath AI ↗

An AI assisted career guidance platform

- Generates personalized career roadmaps based on skills, interests, and career goals.
- Provides learning guidance, project suggestions, and progress tracking.
- **Tech Stack:** TypeScript, HTML, CSS, LocalStorage

Inventory Management System ↗

A software application designed to manage inventory records and simplify stock tracking.

- Manages product details, stock quantities, and inventory records.
- Helps organize inventory information and monitor stock levels.
- **Tech Stack:** C language
